POWERED ACCESS TROUBLE SHOOTING

PROBLEM: WORKING CONDITIONS	Slopes, uneven ground, potholes, loose terrain and steep inclines
SOLUTION	4x4 tracked machines with stabilizer legs
HOW IT WORKS	4x4 means drive to all four wheels creating more traction to get through the roughest of terrain. Stabilizer legs can be deployed and level the machine before ascending
MACHINES TO CONSIDER	SD120T • TD120T • RT scissor lifts

PROBLEM: OBSTRUCTIONS	Girders, overhangs, conservatories and fencing.
SOLUTION	Boom lifts - articulated with a jib arm
HOW IT WORKS	Articulated boom lifts enable user to go up and over most obstacles and the jib arm allows you to get into those tight spaces
MACHINES TO CONSIDER	HR17 • HR17N • HR21

PROBLEM: CONFINED SPACES	Narrow single doorways, tight alleyways and between warehouse racking
SOLUTION	Narrow scissor lifts or narrow boom lifts
HOW IT WORKS	Narrow access machines have a much smaller width than standard enabling the user to get through single doorways and access those tight gaps
MACHINES TO CONSIDER	GR15 • GR20 • 19' scissor • 26'N scissor • Star10 • HR12N • HR17N

PROBLEM: NOISE LEVELS	Low noise constraints, early morning work and night work
SOLUTION	Hybrid or electric machines
HOW IT WORKS	Electric access machines run off battery power causing very low noise levels. Hybrid technology gives you both diesel and electric options
MACHINES TO CONSIDER	All electric scissors and hybrid booms

PROBLEM: WEIGHT RESTRICTIONS	Mezzanine floors, delicate floors, tiled floors and weight restricted elevators
SOLUTION	Low weight access machines under 1Ton
HOW IT WORKS	Light weight access machines are built specifically for this job. Ideal for 1 person and compact and light weight enough to go in a lift or be pushed into the working area
MACHINES TO CONSIDER	AWP25S • AWP30S • Power Towers • Nano SP • GR15

PROBLEM: EMISSIONS	Green sites, LEZ zones and no pollution
SOLUTION	Hybrid or electric machines
HOW IT WORKS	Hybrid machines have the capability to work in just battery mode where in the past this has only been achievable with a diesel only engine
MACHINES TO CONSIDER	All electric scissors and hybrid booms

PROBLEM: NO MESS	Valuable floors, antique floors, precious stone tiles and laboratories
SOLUTION	Non marking tyre machine and/or wheel protection covers
HOW IT WORKS	All of our electric machines come with non marking tyres as standard. We also stock wheel covers that can be easily fitted to each machine
MACHINES TO CONSIDER	All electric scissors and hybrid booms

Why choose Mark One?

- ✓ Unrivalled customer service
- ✓ Helpful, knowledgeable team
- ✓ Equipment you can rely on
- ✓ Prompt delivery and collection
- ✓ 20% off 4 week hires
- ✓ Dedicated training facilities
- ✓ Easy payment options
- ✓ Specialist departments

SCISSOR LIFTS

For straight up and down working, scissor lifts provide the ideal solution, transporting users and their tools to an elevated work place quickly and safely.

BENEFITS

- Excellent manoeuvrability
- Control box allowing user to control from ground or cage
- Low noise levels
- Non-marking tyres
- Electric and diesel available

SAFETY FEATURES

- Tilt sensor with audible alarm
- Emergency stop switch at both platform and ground controls
- Heavy duty steel guardrails
- Pothole guards
- Roll out platform extension
- Built-in lanyard attachment
- Solid steel deck with slip-resistant surface
- Emergency manual platform lowering valve

WHEN HIRING YOU WILL BE PROVIDED WITH:

- A Certificate of Thorough Examination (LOLER)
- Operators Instruction Manual

Plus documented Handover Familiarisation to ensure you fully understand:

- Basic functions of the unit
- Pre-operational safety checks and maintenance
- Setting up procedure
- Site conditions and safety

Please note that Handover Familiarisation is not a replacement for training in the correct use of powered access equipment.

19' SCISSOR LIFT

TECHNICAL SPECIFICATION

	Metric
Working Height:	7.8 m
Platform Height:	5.8 m
Height Stowed (Guardrails down):	1.75 m
Height Stowed (Guardrails up):	2.10 m
Length:	1.78 m
Width:	0.81 m
Ground Clearance:	6 cm
Ground Clearance - Pothole Protectors Deployed	1.78 cm
Platform Length - Stowed:	1.63 m

BOOM LIFTS

If your planned work requires any degree of outreach then Articulated Boom Lifts can perform an incredible range of tasks.

BENEFITS

- Outreach capabilities allowing you to overcome obstacles
- Fully proportional hydraulic controls - gets the user elevated rapidly, whilst feathering the controls allows precision positioning of the platform
- Telescopic upper boom for precise positioning
- Bi-Energy – petrol/diesel and battery maximises productivity and provides less down time
- Various machines with hydraulic legs for fast setup on uneven ground

SAFETY FEATURES

- Audible platform overload alarm
- Emergency stop switch at both platform and ground controls
- Heavy duty guardrails
- Built in lanyard attachment point
- Solid deck with slip-resistant surface
- Emergency descent lowering valve

WHEN HIRING YOU WILL BE PROVIDED WITH:

- A Certificate of Thorough Examination (LOLER)
- Operators Instruction Manual

Plus documented Handover Familiarisation to ensure you fully understand:

- Basic functions of the unit
- Pre-operational safety checks and maintenance
- Setting up procedure
- Site conditions and safety

Please note that Handover Familiarisation is not a replacement for training in the correct use of powered access equipment.

TOWABLE BOOM LIFTS

These machines are road towable and can be transported easily from site to site and set up quickly using built in hydraulic outriggers. They are light and compact and offer an excellent working envelope.

BENEFITS

- Outreach capabilities allowing you to overcome obstacles
- Fully proportional hydraulic controls - gets the user elevated rapidly, whilst feathering the controls allows precision positioning of the platform
- Telescopic upper boom for precise positioning
- Bi-Energy – petrol/diesel and battery maximises productivity and provides less down time
- Various machines with hydraulic legs for fast setup on uneven ground.

SAFETY FEATURES

- Audible platform overload alarm
- Emergency stop switch at both platform and ground controls
- Heavy duty guardrails
- Built in lanyard attachment point
- Solid deck with slip-resistant surface
- Emergency descent lowering valve

WHEN HIRING YOU WILL BE PROVIDED WITH:

- A Certificate of Thorough Examination (LOLER)
- Operators Instruction Manual

Plus documented Handover Familiarisation to ensure you fully understand:

- Basic functions of the unit
- Pre-operational safety checks and maintenance
- Setting up procedure
- Site conditions and safety

Please note that Handover Familiarisation is not a replacement for training in the correct use of powered access equipment.

BoSS ALUMINIUM TOWERS 6' X 5' (1800MM X 1450MM)

Our range of access towers all comply with Health & Safety Executive's recommended assembly methods 3T (Through the Trap) and the advanced guardrail system. The 3T method requires that the operator takes up a position of minimum risk within the trap; from this position guard rail components are added or removed on the level above.

1.5M PODIUM STEPS

This unit has been designed to provide a safer way of working at low levels and offers six platform heights of: 250mm, 500mm, 750mm, 1m, 1.25m and 1.50m. Its 600mm² platform area offers an ideal working space for one man and tools. With a telescopic handrail section the correct guardrail height is achieved at each of the six levels to ensure user safety. The unit is fitted with anti-surf feet that prevent the user from moving the unit whilst standing on the platform. The podiums can be moved simply by lifting the fixed side and wheeling it along. When open or closed the unit will pass through doors and corridors with ease when extension pack is lowered.

GRP STEPS

Glassfibre Reinforced Plastic (GRP) Step Ladders are non sparking and corrosion resistant, ideal for areas where there is a risk of fire or hazard from electrical or chemical contact. In addition they are suitable for use in 'clean' environments such as food and hi-tech manufacturing. They are suitable for inspection work, access to work places and in accordance with the Working at Height regulations, light work of a short duration.

WARNING - EQUIPMENT SPECIFICATION MAY VARY SLIGHTLY. IF IN DOUBT PLEASE PHONE TO CHECK.

All prices shown exclude VAT. Long term rates must be agreed at time of hire.

STAGING BOARDS & HANDRAILS

All Staging & Handrail Systems comply with the relevant BS2037 specifications. Staging boards are non-slip and able to support up to 270kg. When used in conjunction with the hand rail system they provide a safe means of working at height and are ideal for linking all towers.

DESKSPAN HIGH-CLEARANCE TOWERS

This unit is specifically designed to be used over non-movable objects such as desks, hedges, conveyers etc. This unit allows for a 1.5m height clearance, with a working platform of 2.5m x 0.7m and safe working load of 250kg. The use of AGR (advance guard rail) reduces the amount of components and time required to erect this work platform.

HIRE RATES - STAGING BOARDS (450MM WIDE)					
Code	Description	1 day	+1 day	1 week	4 weeks
010220	Deskspan high clearance tower	£45.00	£15.00	£75.00	£60.00*

Heights specified are platform height, not working height *price per week

WARNING - EQUIPMENT SPECIFICATION MAY VARY SLIGHTLY. IF IN DOUBT PLEASE PHONE TO CHECK.

All prices shown exclude VAT. Long term rates must be agreed at time of hire.

TRESTLES & SCAFFOLD BOARDS

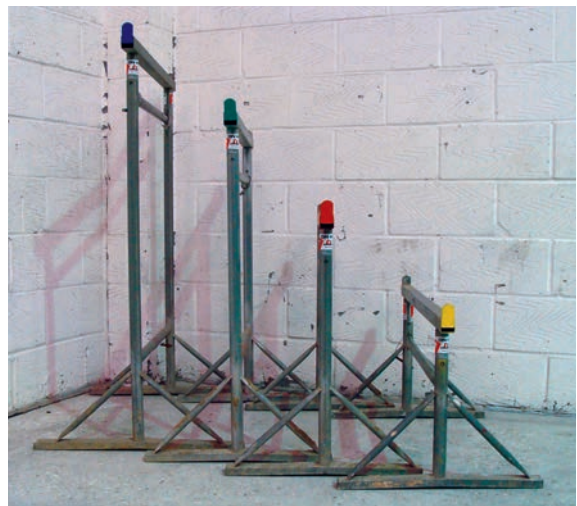

Builder's trestles are certified to BS2037 class 1 and can incorporate a handrail and support system. Changes in the Working at Height legislation means that trestles should only be used for light work of short duration.

*price per week

ROOF LADDERS

An aluminium ladder designed principally to reduce risk to the user. It uses a ridge hook to hold the ladder in position with support bearers to distribute weight evenly preventing damage to the roof. Two wheels fitted to the underside allow the ladder to be pushed up the roof without causing damage to slates or tiles. Designed for pitched roofs up to an angle of 55° the ladder is easily positioned and totally secure in use. Available to hire as either a 4.2m single ladder or as a double 6.6m extending one.

HIRE RATES

Code	Height	1 day	+1 day	1 week	4 weeks
010090	14' (4.24m)	£21.00	£4.00	£29.00	£23.00*

IPAF TRAINING

We offer a full range of IPAF courses including; IPAF Operator, IPAF Demonstrator, IPAF PAV, IPAF Harness, IPAF Load/Unload, IPAF MEWPS for Manager and IPAF PAL+

THE IPAF OPERATOR COURSE

We offer training for anyone that operates Mobile Elevated Work Platforms (MEWPs), typically Scissor Lifts, Vertical Platforms, Cherry Pickers, Static or Self Propelled Telescopic and Articulating Booms.

MACHINE CATEGORIES

Category 3a Mobile Vertical

Scissor lifts, vertical personnel platforms (mobile)

Category 1b Static Boom

Self-propelled booms (outriggers), trailers/push-around, vehicle mounted platforms

Category 3b Mobile Boom

Self-propelled boom

- Courses run on a daily basis (Monday to Friday)
- Saturday training available (at an additional cost)
- Approved IPAF Training Centre
- On site training available (subject to certain requirements)
- Group discounts available
- Accredited by IPAF – IPAF card and certificate included, valid for 5 years
- Please visit our website or contact us for more details

PRICES

IPAF1	£150 per person	1 machine category
IPAF2	£175 per person	2 machine categories
IPAF3	£225 per person	3 machine categories

Choose from Scissor Lift 3A, Mobile Boom 3B, Static Boom 1B

PASMA TRAINING

We offer a full range of PASMA training courses including; PASMA Towers for Users, PASMA Combined, PASMA Low Level Access, PASMA Towers for Managers, PASMA Towers for Stairs and PASMA Working at Height Essentials

PASMA TOWERS FOR USERS

This training is for anyone who needs to assemble, alter, dismantle, move, inspect and most importantly USE alloy or fibreglass Mobile Access Towers. This not only includes construction sites but all work places, such as schools, offices and factories, both internally and externally.

- Courses run at least twice weekly (Monday to Friday)
- Courses scheduled to customer demand for a minimum of 4 delegates
- Saturday training available (at an additional cost)
- Approved PASMA Training Centre
- On site training available (subject to certain requirements)
- Group discounts available
- Accredited by PASMA – PASMA card and certificate included, valid for 5 years
- Please visit our website or contact us for more details

PRICES

PASMA	£99 per person	PASMA Towers for Users
--------------	----------------	------------------------

We also run a range of other courses, please visit our website or contact us for more details
