

GEN24000 24kva Multiphase generator

The GEN24000 is a powerful and robust multiphase generator. The unit is fitted with a Vanguard 35hp petrol engine and is designed for professional and intensive use in construction and other activities. The generator is reliable and durable, suitable for use with a wide selection of equipment including floor preparation equipment, dust control vacuums, screed mixers and other site equipment. Three phase and single phase equipment can be run simultaneously making it ideal for use with shot blasting grinding and planing equipment with the required dust control vacuum. The unit is portable and easy to transport in a van to site and has a large 20ltr fuel tank. A 110v transformer can be connected to the 230v socket to power 110v tools and equipment

Application

- Providing 400v and 230v power to a wide range of site equipment.

Specifications	
Model	GEN24000
Voltage	400v and 230v
Power output	24kva / 19.2kw 400v 8kva / 6.5kw 230v
Engine power	35 hp
Weight	197kg
Dimensions	W 79 x L 100 x H 87 cm
Fuel capacity	20ltr
Noise level Lwa	99 dB
Start system	Electric start
